**0260130000**

### **TIRE GLOSS:**

It renews the appearance of the tires with a long-lasting ultra-glossy effect. Adheres to any type of tire from the newest to the most used. It does not stick, does not stain and does not attract dust or insects. Tire Gloss contains bright polymers that offer a super wet effect and a shiny finish, it protects from atmospheric agents and from aging caused by sun exposure to UV rays, giving a deep and lasting black to the tire.

Carefully wash the tires and make sure that the surface is completely dry, then apply 2-3 sprays on the special foam sponge. Spread it evenly over the entire surface. Let it dry for 10-15 minutes and remove the excess with the special Microfibre cloth.

**AVAILABLE FORMATS: 500ml - 5lt - 10lt - 25lt**

**0260130001**

### **TIRE BLACK:**

It renews the appearance of the tires with a long-lasting effect, shiny finishing or matt finishing if removed with a microfiber towel. It perfectly adheres to any type of tires from the newest to the most used ones. Tire Black creates a water-repellent barrier on the tire, protecting it from atmospheric agents and against aging caused by sun exposure to UV rays. It gives a long lasting deep black finish to the tire. Thoroughly wash and dry the tires, apply the product on the applicator sponge and spread the product evenly over the entire side of the tire. Remove the excess after a few minutes for a matt finish or leave it to dry for 10-15 minutes for a more shiny effect. If the tires are very old, it is recommended to apply the product twice.

**AVAILABLE FORMATS: 500ml - 5lt - 10lt - 25lt**

**0260080000**

### **ACID REMOVER:**

Specific product to efficiently remove heavy stubborn dirt such as: iron, rust, tar, minerals, limestone, saltiness and also oxidation or brake lining traces.

It gives a perfect clean brightness. To be applied on: rims, exhaust pipes and aluminum and stainless steel parts.

Acid Remover CONTAINS FLUORHYDRIC ACID, before use it is suggested to test it on a small hidden area to check the result. Wet the surface to be treated, spray the product directly on the area, if necessary gently brush it with a soft hair brush with split ends and rinse abundantly with steam-hydrojet or water. Dry with a microfiber towel. If the surface is very dirty, repeat the process.

**AVAILABLE FORMATS: 500ml - 5lt - 10lt - 25lt**

**0260120000**

### IRON REMOVER:

Decontaminant for removing ferrous residues from rims and bodywork. It respects all the surfaces thanks to its neutral pH formulation, it does not contain acids or soda and it is safe for the user. At the end of the treatment the surface will be deeply cleaned and decontaminated. The surface is now protected against re-oxidation for a few weeks thus reducing the porosity of the treated surface. Shake before use and spray directly on the surface to be treated. Leave the product to act for 5 - 6 minutes depending on the level of contamination. Its cleaning and decontaminating action will be visible thanks to the purplish red color it assumes when it encounters ferrous residues. Rinse with water or steam and hydro jet and dry the surface with a microfiber cloth. Do not let the product dry. If it dries, use the product again. Do not use the product on hot surfaces.

**AVAILABLE FORMATS: 500ml - 5lt - 10lt - 25lt**

**0260120001**

### TAR & GLUE REMOVER:

Special detergent for quickly removing tar, resins, glue, stickers from the car body paint, glass windows and wheels. It is not oily, easily removable with a microfiber or rinsed with water. Spray pure on the surface to be decontaminated and wait for some minutes. Clean with a dry cloth to check the effective removal of the contaminant. Finally, rinse with high pressure water or with steam and hydro jet function. Pay attention to plastics or adhesives.

**AVAILABLE FORMATS: 500ml - 5lt - 10lt - 25lt**

**0260120002**

### QUICK WAX:

Quick and easy to apply protective wax.

Quick Wax is a product designed to flawlessly finish your car wash. It allows removing marks, fingerprints and surface dirt. It creates an immediate smooth surface with a "silky" touch, it provides a water and dust repellent action thanks to its antistatic feature and it guarantees a super glossy effect, highlighting the body color in the best possible way. It also protects the surface from atmospheric agents, pollution and bird droppings. Its constant use makes the next car wash easier, reducing the car wash frequency. Spray evenly on the surface to be treated and spread evenly with a microfibre cloth until completely dry. It can also be used on glass and plastics.

**AVAILABLE FORMATS: 500ml - 5lt**

**0260090000**

### **PLASTIC RESTORER:**

It renovates and protects interior and exterior plastics, vinyls and ABS surfaces. It gives a glossy effect and color depth for a bright and shiny finishing. Plastic Restorer guarantees long lasting protection from UV rays, releasing an excellent fragrance.

Carefully wash and dry the surfaces to be treated, apply 2-3 sprays on the foam sponge and spread the product evenly over the entire surface. Let it dry for 5 minutes before removing the excess with the special microfibre towel.

**AVAILABLE FORMATS: 500ml - 5lt - 10lt**

**0830080002**

### **NANO PREP - decontaminant:**

Nano Prep is a decontamination cleaner which specifically removes paste or other oily, grease residuals from the paint after the polishing process. Nano Prep helps to prepare the surface before the application of nanotechnology or waxes protection products. Spray the product evenly on the surface and buff it with a clean microfiber towel till the surface is completely dried.

**AVAILABLE FORMATS: 500ml**

# POLISHING LINE

**0830080010**

### **HARD CUT N°0:**

Highly abrasive paste, the first step is useful to remove scratches from the car body caused by sanding P1200-P2000. The Hard Cut n°0 abrasive paste is an excellent ally to get rid of important scratches thanks to its thick grain. It can be used either on old and oxidized paints or on fresh and well dried paints. Shake before use, apply the product on its specific cutting pad Yellow Pad n°0. Apply the pad on the surface to treat and use the polisher at minimum speed. Use the polisher at medium speed for 90 seconds. Remove the residues with a microfiber cloth. According to the result you obtained, decide whether to proceed with Gloss Cut n°1 or Deep Gloss n°2.

**AVAILABLE FORMATS: 1kg**

**0830260009**

### **YELLOW PAD N°0:**

Rigid and rough cutting pad, it allows you to treat correctly the surface to get rid of scratches. Yellow pad n°0 combined with Hard cut n°0 guarantees an excellent finish. This pad improves the efficiency of the paste.

**0830080000**

### **GLOSS CUT N°1:**

Highly abrasive paste, in just one step you'll get abrasive and polish action, it removes P1500-3000 sanding, according to the paint characteristics. Useful on scratched car bodies. Shake before use, apply the product on its specific cutting pad Orange Pad n°1. Apply the pad on the surface to treat and use the polisher at minimum speed. Use the polisher at medium speed for 90 seconds. Remove the residues with a microfiber cloth. To obtain a brighter and glossy effect use the Deep Gloss n°2. Remember, if the surface is in bad condition, we suggest you start using the Hard Cut n°0.

**AVAILABLE FORMATS: 1kg**

**0830260010**

**ORANGE PAD N°1:**

Cutting pad, not as rigid and rough as the Yellow pad n°0. Not only does it get rid of scratches, but also it boosts the shiny effect of its paste: Gloss Cut n°1. Orange pad n°1 and Gloss Cut n°1 were studied to be used together, as you can see from their color, to obtain an excellent finish.

**0830080001**

**DEEP GLOSS N°2:**

It is a polishing paste with a low abrasive effect, it is commonly known as "Polish against holograms". Thanks to its special formula that combines nanotech abrasives and polishing agents, this polish guarantees:

- A perfect removal of light opacities, sanding scratches (P4000-P5000), swirls, holograms and small scratches.

- An amazing shiny and glossy effect that will make your car paint stand out.

Shake before use, apply the product on its specific cutting pad White Pad n°2. Spread the paste on the surface evenly with the polisher at minimum speed, then move to medium speed for 30 seconds. Remove the residues with a microfiber towel. We suggest protecting your work by applying the protective Pro Wax n°3.

**AVAILABLE FORMATS: 1kg**

**0830260011**

**WHITE PAD N°2:**

Soft pad to polish, but it can also help to get rid of small scratches or holograms. Used with its paste: Deep Gloss n°2, they guarantee an amazing result.

**0830080009**

### **PRO WAX N°3:**

It is a super-protective wax, it is water-repellent and it guarantees high resistance. Pro Wax n°3 creates a thin but strong layer that sticks to the car paint. It guarantees a glossy effect and it protects the car body against atmospheric agents, UV rays, polluting substances, resins, bird excrements, etc.

Apply the product all over the car body using its specific soft Red Pad n°3.

Let it dry for 10-15 minutes. Remove the residues with a microfiber cloth.

**AVAILABLE FORMATS: 1kg**

**0830260012**

### **RED PAD N°3:**

Extra soft pad, studied to apply correctly and evenly the wax. It guarantees a higher absorption of the product by the car body paint. Its qualities are boosted if used with its paste Pro Wax n°3.

# PROTECTION LINE

**0850080000**

### TEXTILE NANO COAT:

Specific product for the care of all the interior textile surfaces and also for the textile hood. Textile Nano Coat creates a hydrophobic and oleophobic film ensuring protection against liquids, dirt and dust which, this way, can't enter the textile fibers. Therefore the care and the cleaning of the interiors is by far easier and the normal aging process due to weather and polluting agents, UV rays, moisture, smog comes slowed down.

**AVAILABLE FORMATS: 500ml**

**0850080004**

### GLASS ERASER:

Specific decontaminant for glass and metal. Glass Eraser is the basic step to prepare the surface before the application of Glass Nano Coat. It removes traces and residuals of fat, iron, resin and limestone, providing a deeply clean and fully decontaminated surface. Spread the product evenly on the surface and wait for the complete drying: then remove it with a microfiber cloth with circular motion.

If necessary, wet the surface to facilitate the product removal.

**AVAILABLE FORMATS: 500ml**

**0850080003**

### GLASS NANO COAT:

It protects car glass windows from dirt, atmospheric agents and air pollution thanks to its long lasting hydrophobic and oleophobic features.

The rain drops on the coated glass will flow away with the air created by the car speed thus avoiding the formation of dirt and limestone residuals which can oxidize the surface. It also increases visibility and it drastically reduces the use of the windshield wipers.

Conditions of storage: Do not store at temperatures higher than 25 °C

**AVAILABLE FORMATS: 30ml**

**0850080001**

### EXTERIOR NANO COAT:

Nanotechnological product to protect the outer surfaces of your car.

Exterior nano coat creates a hydrophobic, oleophobic and protective film giving the surface a smooth, silky touch finishing. It protects the paint from aging caused by polluting agents, weather, UV rays and birds' dirt. It preserves the shine and brilliance of the paint thus reducing the number of car-washes.

Applicable on car body paint and gelcoat.

**AVAILABLE FORMATS: 50ml**

**0850080002**

### INTERIOR NANO COAT:

Specific product to protect all interior car surfaces, except fabrics. It creates a protective layer against dirt and aging. With antibacterial action. Hydro & Oleophobic features.

**AVAILABLE FORMATS: 100ml**

**0830080002**

### NANO PREP-decontaminant:

Decontaminante specifico per rimuovere residui di paste ed eventuali oli e grassi presenti sulla carrozzeria dopo la lucidatura. Nano Prep aiuta a preparare la superficie prima dell'applicazione di prodotti di protezione nanotecnologica o cere garantendo un'aderenza ottimale.

**AVAILABLE FORMATS: 500ml**

# BIODEGRADABLE DETERGENT LINE

0030040002

### INTERIOR CLEANER:

Specific detergent for the car interiors steam cleaning. Interior Cleaner has been studied to be used combined with our 09EVO steam machines. It cleans all the materials in the car interiors: plastics, fabrics, natural and synthetic leather, car mats, upholstery. It is safe for the environment and the operator because it does not contain allergens, it only contains biodegradable substances and mineral salts.

Interior Cleaner has our DettaglioAuto fragrance: DettaglioAuto Air Freshener. It gives away a delicate and pleasant feel of cleanliness.

Shake before using it. if used combined with our steam equipment, dilute the product with water at 3-6%. Spray steam and detergent on the surface, brush it and then proceed with the vacuuming phase. For stubborn stains, spray Interior Cleaner pure directly on the surface.

AVAILABLE FORMATS: 500ml - 5lt - 20lt

0030040000

### VAPOR BRILL:

Specific eco cleaner for car exteriors steam cleaning. Vapor Brill has high biodegradability > 90% and comes without allergenic ingredients. It is safe for both the environment and the operator. Vapor Brill guarantees a long lasting shiny result with a protective action thanks to the presence of natural carnauba wax in its composition.. A detergent with a good lubricating action that allows the removal of dirt without compromising the surface and the result. Use Vapor Brill every time to get a perfectly clean, shiny and protected car!

Method of use with steam machines: dilute in water at 1% and pour the solution into the appropriate detergent tank provided with the 09EVO steam equipment.

Spray the solution with steam on the surface to be treated evenly, remove it using steam and a microfibre cloth.

AVAILABLE FORMATS: 500ml - 5lt - 20lt

0030040001

### CRYSTAL GLASS:

Glass cleaner, useful to degrease and clean all the car windows. It gets rid of dirt and dust without leaving halos thanks to its self-drying feature. it guarantees a uniform and shiny result. It can be used on mirrors, crystals, windows, plastic laminates and polished and chromed surfaces. Crystal glass is highly biodegradable and it does not contain allergens, it can be used also as a dust cleaner for car interiors and exteriors.. Shake it before using it, spray it directly on the surface to treat and remove it with a cloth. We advise using the specific DettaglioAuto window cloth, in order to obtain a fast but perfect result.

AVAILABLE FORMATS: 500ml - 5lt - 20lt

**0030040006**

### AIR FRESHNER:

Our air freshener has a delicate scent that offers a pleasant feeling of cleanliness. Air Freshener releases a light, non-invasive but lasting fragrance. It is a highly biodegradable product according to the OECD 301 test or others, moreover, it does not contain allergens.

Thanks to its gentle fragrance it is suitable for everyone.

Shake before use and spray it as much as you like directly on the car mat.

**AVAILABLE FORMATS: 500ml - 5lt - 20lt**

**0030040003**

### PRE CLEANER:

Specific degreasing detergent to easily remove insects and resins from the car body. It is a pre-cleaner studied to remove more easily and faster most of the dirt before the steam cleaning. Pre-cleaner doesn't contain allergens, it only contains mineral salts and biodegradable substances. Shake before use, spray it directly on the surface to treat and let it act for a few minutes, but don't let it dry! Remove it using steam and the hydro jet function or rinse the surface with water.

**AVAILABLE FORMATS: 500ml - 5lt - 20lt**

**0030040004**

### RIM LUX:

Specific detergent for fast and perfect car rims cleaning.

Thanks to its degreasing action it removes the dirt, easing the manual steam cleaning of the rim. After rinsing the surface with steam or water hydrojet the surface will be perfectly clean and shiny. Rim Lux is a safe product for the environment and for the user, its formula does not contain allergens, it only contains rapidly biodegradable substances and mineral salts.

Shake before use, spray pure on the rim and leave on for a few minutes.

We suggest using a specific brush to clean the rims. Rinse the surface and dry it using a microfiber cloth.

**AVAILABLE FORMATS: 500ml - 5lt - 20lt**
